Pieces from ORD-- I'm guessing we have these already.  
Please incorporate as relevant.

Thanks.

Hi Guys,

This is the what we have on GenX - the first is a desk statement on GenX that contains both historical (what is going on in NC) and some technical info as well. GenX is in the family of perfluorinated compounds and was a substitute for another compound in the same family - 3rd doc contains additional FYI on what EPA is doing. Let me know if this helps, thanks, Richard
